# waterwatch

New Hampshire | Spring - 2025

## Understanding Your Water Usage

While your water bill shows your total consumption, it can be surprising to see how this breaks down for different rooms of your house, and even the averages per person. Our online, interactive water calculator will give you this information and more, and help you identify where your conservation efforts will have the greatest impact. Visit [aquarionwater.com/calculator](https://aquarionwater.com/calculator) and start saving more water today.

## Did You Know?

**Leaky toilets can silently waste hundreds of gallons of water each month. To check if your toilet is leaking, add a few drops of food coloring to the tank. If the color appears in the bowl without flushing, you have a leak. Learn more at [aquarionwater.com](https://aquarionwater.com).**

## Who'll Be Our Environmental Champions for 2025?

### 2025 ENVIRONMENTAL CHAMPION AWARDS

This year, Aquarion's Environmental Champions program turns 12. Thanks to customers like you, we've been able to highlight and support dozens of environmental causes across our state.

Now we're hoping you'll help us celebrate this milestone. Please let us know about an individual, organization or business that's doing great volunteer work to protect or improve New Hampshire's environment. The winners will then be able to direct a \$5,000 grant from Aquarion to their favorite environmental non-profit organization. The student winner will take home a \$1,000 award.

You can nominate candidates in any of the four categories: Adult, Non-Profit, Business and Student. And since no environmental hero should go unsung, we welcome self-nominations, too.

We'll name our 2025 Environmental Champions on June 19 at a special awards event at the Great Bay National Estuarine Research Reserve. Just be sure to get your nomination in by May 24. For all the details, visit [aquarionwater.com/awards](https://aquarionwater.com/awards).

## Exploring Your Annual Water Quality Report

Nothing gives us more satisfaction than supplying our customers with high-quality water – and sharing the testing results with you comes in a close second. You'll find detailed information about your water system in our annual water quality report.

Aquarion's water continues to meet or exceed all state and federal quality standards. Your report will give you detailed testing results, information on the source of your water, and how we treat it to ensure its quality and purity. There's

also a wealth of information on how we protect our water sources, and how you can contribute to conserving this precious resource.

Learn more by checking out our latest reports at [aquarionwater.com/wqr](https://aquarionwater.com/wqr).
