

## Time To Replace Your Water Meter

To ensure your water meter is reading accurately, Aquarion is required to periodically test your water meter at no charge.

If you have been notified that you're due for a meter replacement, please be sure to schedule an appointment right away. Scheduling an appointment is easy, just log into the Aquarion portal at [aquarionwater.com/my-account](https://aquarionwater.com/my-account) or call our Customer Service Center at 1-800-732-9678.

Replacement takes approximately 30 minutes. Please remember, we will not request entry into your home without an appointment. Aquarion representatives always carry company-issued photo identification.

## Did You Know?

You can learn more about your drinking water in our latest Water Quality Report for your community. Check it out at [aquarionwater.com/wqr](https://aquarionwater.com/wqr).

## We've Named Our 2022 Environmental Champions!

August 4 was a great day for nature and the environment as Aquarion celebrated the latest group of winners of our Environmental Champion Awards at an event at Hampton's Victoria Inn.

Since 2013, the program has honored individuals and organizations making outstanding contributions to preserving their state's natural resources and adopting sustainable practices to protect the local environment.

"We're inspired by the advocates who passionately devote their time and resources to environmental conservation, which is a vital undertaking for the state's future," said Carl McMorran, Aquarion's New Hampshire Operations Manager. "Aquarion is proud to celebrate this year's Environmental Champions for their accomplishments in protecting and preserving New Hampshire's waterways, land, and wildlife habitats."

To learn more about Aquarion's 2022 Environmental Champions and their achievements, please visit [aquarionwater.com/awards](https://aquarionwater.com/awards).

### AWARD WINNERS

#### BUSINESS:

A Place to Grow, Brentwood

#### NON-PROFIT:

Blue Ocean Society for Marine Conservation, Hampton/Portsmouth

#### ADULT:

Deborah Alberts, Greenland

#### STUDENT:

Wesley D. Stocken, Hanover

## Imagine a Day Without Water

October 20, 2022

Across the U.S., the news continues to be full of stories about water scarcity, whether in rain-starved forests, parched farmlands or shrinking lakes and rivers.

Here in the Northeast, rainfall has been relatively scarce, especially the long, gentle kind needed to soak through the soils and fill groundwater and reservoirs.

Society's need for water is well worth thinking about and doing all that's possible to conserve the water we use. To encourage that, Aquarion is joining

other water utilities throughout the country in designating October 20, 2022 as a special day to "Imagine a Day Without Water."

What do you think life would be like without easily accessible water? What would you drink? What would you bathe, clean and garden with? How would farmers irrigate the food you rely on? How would countless businesses make their products and provide their services?

Make October 20 a day to consider what your home and community would be like without water. Bring family, friends, and co-workers into the conversation. And be sure to tap into [aquarionwater.com/conserve](https://aquarionwater.com/conserve). You'll find a variety of tips on how you can use water more efficiently.
