Abenaki Water Company
Water Supply Update

Serving the Communities of Belmont, Bow and Gilford

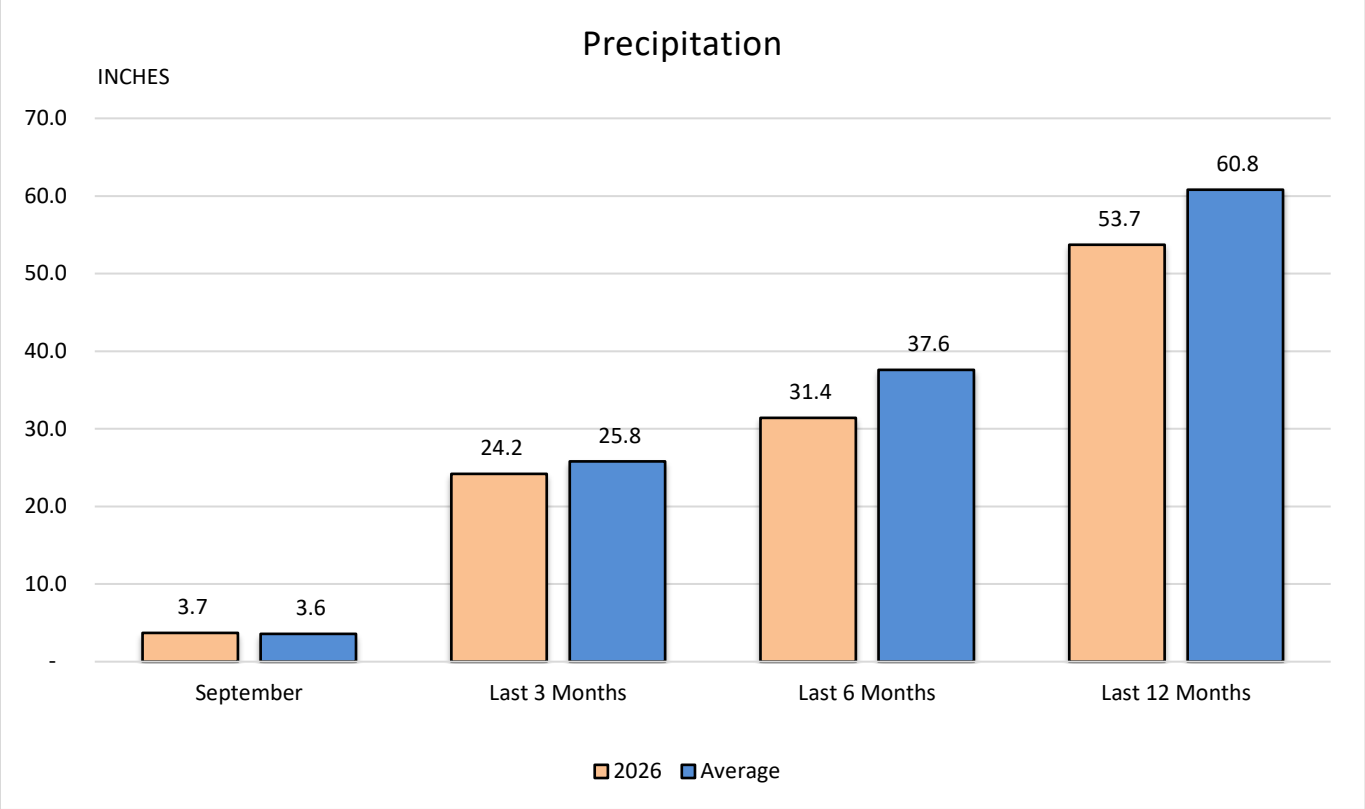

Weather Trends/Outlook

Rainfall in August was close to normal (3.7 inches compared to an average of 3.6 inches) and the region remains in Abnormally Dry conditions (see the U.S. Drought Monitor map below).

No water use restrictions are currently in place yet residents are encouraged to use water conservatively. Less demand over the winter will help local aquifers recharge thereby lowering the probability of water use restrictions later this spring and summer.
