

## Water Supply Update

*Serving the Communities of Hampton, North Hampton, Rye & Stratham*

### Weather Trends/Outlook

January was drier than normal; only 2.0 inches compared to 3.6 inches on average. Rainfall has been less than average each month since June 2025 and the seacoast remains in a Moderate Drought condition (see the U.S. Drought Monitor map below).

Through the winter season, water use restrictions are no longer in effect for Aquarion customers yet residents are encouraged to use water conservatively. Less demand over the winter will help local aquifers recharge thereby lowering the probability of water use restrictions next spring and summer.

### U.S. Drought Monitor New Hampshire

**January 27, 2026**

(Released Thursday, Jan. 29, 2026)

Valid 7 a.m. EST
